Lecture 7-8pm

Q&A 8-8.30pm

*Completing a task with efficiency

An evening with...

Nectaria Polycarpou

Crown-root fractures

Tuesday 31st May 2022

Domain C

Nectaria Polycarpou has been specialist in endodontics since 2003.

She has been part of the Department of Restorative Dentistry and Traumatology at KCH since its inauguration in 2010 and was made a consultant in 2012.

She enjoys all aspects of endodontics and has been involved in the adult trauma service and research as part of a dedicated team at KCH, leading to some well received publications.

She is a member of Dental Trauma UK and has spoken at the DTUK conference in 2016.

Nectaria is heavily involved in postgraduate teaching and has been educational supervisor for the postgraduate endodontic students at KCH since 2020.

She also works part time as an endodontist in private practice.

Aim

The aim of this lecture is to describe the aetiology, clinical and radiographic presentation of crown-root fractures and the best way to manage them with step-by-step guidance using real clinical cases.

Objectives

1. Outline the clinical and radiographic features of crown root fractures
2. Describe the management of crown root fractures
3. Discuss different treatment options when managing crown root fractured teeth

Each evening will offer 1.5 hours enhanced CPD
