Lecture 7-8pm

Q&A 8-8.30pm

*Completing a task with efficiency

An evening with...

Reza Aryafar

Lateral luxation

Tuesday 27th September 2022

Domain C

Reza is a Consultant and Specialist in Endodontics at King's College NHS Trust.

He leads the adult dental trauma service at King's and has contributed to several publications on the subject of dental trauma.

He completed his specialist training at King's College London in 2017 and has worked both in specialist practice and at King's college hospital treating patients, supervising postgraduate students and junior staff. He also runs courses for general dental practitioners and foundation dentists to enhance their skills and knowledge in endodontics.

Reza is also involved in teaching and examining of students on endodontic courses.

Aim

The aim of this lecture is to describe the aetiology, clinical and radiographic presentation of lateral luxation injuries and how they are managed using step-by-step guidance with real clinical cases.

Objectives

1. Outline the clinical features of lateral luxation
2. Discuss the clinical and radiographic features of lateral luxation
3. Describe the management of lateral luxation

Each evening will offer 1.5 hours enhanced CPD
