Lecture 7-8pm

Q&A 8-8.30pm

*Completing a task with efficiency

An evening with...

Alex Falanga

Root fractures

Tuesday 28th June 2022

Domain C

Alex qualified from dental school in 2002 in Rome and moved to the UK in 2004 to work in general dental practice. In 2008 he limited his practice to endodontics and completed his 4 year MClinDent specialist training in 2012 at King's College London. He was awarded the MEndo from the Royal College of Surgeons of Edinburgh.

Until recently Alex was Consultant in Endodontics at King's College Hospital in Denmark Hill, London where he was training and supervising future specialists and consultants at King's College Hospital.

Alex was also a Honorary Clinical Teacher at King's College London and is regional representative for Dental Trauma UK and a study club director for Dentinal Tubules and runs an endodontic referral practice in Norwich.

Aim

The aim of this lecture is to describe the aetiology, clinical and radiographic presentation of root fractures and the best way to manage them with step-by-step guidance using real clinical cases.

Objectives

1. Outline the clinical and radiographic features of root fractures
2. Describe the management of root fractures
3. Discuss the healing possibilities of root fractured teeth

Each evening will offer 1.5 hours enhanced CPD
